Entry Metadata

Secrets of Craft and Nature in Renaissance France A Digital Critical Edition and English Translation of BnF Ms. Fr. 640

“List of Entries.” In *Secrets of Craft and Nature in Renaissance France. A Digital Critical Edition and English Translation of BnF Ms. Fr. 640*, edited by Making and Knowing Project, Pamela H. Smith, Naomi Rosenkranz, Tianna Helena Uchacz, Tillmann Taape, Clément Godbarge, Sophie Pitman, Jenny Boulboulle, Joel Klein, Donna Bilak, Marc Smith, and Terry Catapano. New York: Making and Knowing Project, 2020. <https://edition640.makingandknowing.org/entries>.

Ms. Fr. 640 consists almost entirely of distinct “entries,” i.e., units of text with titles. They have been grouped into **categories** to help browse the manuscript. Within entries, meaningful terms have been **tagged**.

Each entry in the manuscript is listed here by title, folio, and entry id with its assigned categories, tagged terms, and any Research Essays associated with it. This listing has been derived from the **List of Entries** resource in *Secrets of Craft and Nature*.

Mouler serpents en tout temps

CASTING

Essays: Molding, Modeling, and Repairing: Lifecast Snakes Modeled in Black Wax (Fabien Noirot)

Animals: snakes (×2), snake (×3)

Environments and physical spaces: in all weather

Materials: earth, manure, common plaster, wax (×3), metal

Time and temporal: in the winter, in summer

Tools: barrels filled with earth & covered with manure, molds (×2)

Mixture of tin and lead fol. 116v · p116v_2

Mixture destain et de plomb

CASTING

Body parts: finger

Materials: tin (×7), lead (×7), fine tin, rosin (×2), looking-glass tin, metal, water, sand, silver, gold

Measurements: parts (×2), grains, lb & a half or two, as the size of a hazelnut with its shell, cool until you can hold the tip of your finger in the gate without burning yourself

Plants: hazelnut

Sensory: without burning yourself

Tools: crucible, mold (×2), point, cast, tip of your finger

Cast for copper and latten fol. 116v · p116v_3

Gect pour cuivre et letton

CASTING

Animals: field mice

Materials: copper (×3), latten (×3), red copper, sal ammoniac (×2), old leather, new leather, parings of the feet of field mice, common salt, saltpeter, fine tin, Red copper, Latten, calamine

Measurements: quarter

A means of molding flowers and plants fol. 117r · p117r_1

Moyen de mouler les fleurs et herbes

CASTING

Animals: snakes (×3)

Body parts: fingers

Materials: water, wine, wax (×4), iron wire, clay (×2), good eau-de-vie, iron (×2), earthen (×2), sand (×4), wetted sand, eau-de-vie, sal ammoniac water among the common, feather alum, tempered sand

Measurements: fingers

Music: mandore (×5)

Tools: bottle of water, mold (×3), paintbrush, iron stem (×2), wax peg (×2), small sticks, thread, needle, Mold en noyau

For making the ashes of flowers and plants leave molds fol. 117v · p117v_1

Pour faire sortir la cendre des moules des fleurs et herbes

CASTING

Animals: bird, snake

Materials: ashes, quicksilver (×4), metals, calcined bones of the animal, ☿, charcoal, oil of sulfur & turpentine, solder, filth, ash, iron wire, cotton

Plants: asparagus

Tools: molds, mold, wire drawing plate, iron wire wrapped in cotton, soft brush, cut paintbrush

Daisies fol. 117v · p117v_2

Marguerites

CASTING

Materials: gold, enamel (×3)

Plants: Daisies

Sand that was used fol. 117v · p117v_3

Sable qui ha servi

CASTING

Materials: Sand that was used, feather alum, brick

Molding à noyau figures of wax or medals of lead fol. 117v · p117v_4

Mouler a noyau figures de cire ou medailles de plomb

CASTING

Materials: wax, lead, oil (×2), eau-de-vie, water, sand (×2), plaster, brick, alum, cold water, sal ammoniac

Tools: paintbrush

Blood of snakes fol. 117v · p117v_5

Sang des serpens

CASTING

Animals: snakes, snake

Materials: Blood of snakes, blood, quicksilver

Tools: mold (×3)

Snails fol. 118r · p118r_1

Escargots

CASTING

Animals: Snails, small crabs

Environments and physical spaces: sea, grottos

Materials: aquafortis, mother of pearl

For removing flashing and barbs from things molded à noyau fol. 118r · p118r_2

Pour oster les baves ou barbes des choses moulees a noyau

CASTING

Definitions: chaple

Materials: good plaster, ashes, sand

Tools: molds, presses, boards, vessel filled with ashes or sand, burin, chaple, chisel

For grottos fol. 118r · p118r_3

Pour grottes

DECORATIVE

Essays: Artificial Grottos (Reut Ullman)

Definitions: stuf

Environments and physical spaces: grottos (×3), forests, grotto

Materials: old vine stocks, Stones made from water, stuf, charcoal, compound of tin & fine latten, paper pestled, pestled glass, cork, heated parchment, white coral, fantastical pieces of wood, mushrooms, potirons of trees, looking-glass tin (×2), marcasites, earth, glues, strong glue, minerals, sulfurous marcasites, Rosette

Plants: vine, mushrooms, potirons

Tools: pestled (×2), pestles, hammer

Looking-glass tin fol. 118r · p118r_4

Estaim de glace

CASTING

Materials: Looking-glass tin, firm fine tin, looking-glass tin, fine tin

Measurements: ounce, ⅔, lb

Sal ammoniac fol. 118r · p118r_5

Sel armoniac

CASTING

Materials: Sal ammoniac, Sal ammoniac water, gold, silver

Casting in frames fol. 118v–119r · p118v_1

Gect en chassis

CASTING

Essays: Casting in Frames (Raymond Carlson, Jordan Katz)

Body parts: hands

Definitions: sal ammoniac water, To dry frames, Reheating

Materials: sand that was used in the cooked noyaulx, plaster, brick, feather alum (×2), sand (×5), marble, sal ammoniac water, sal ammoniac (×2), common water, tisane, water (×2), water moderately salty, glass, silver (×2), eau-de-vie, charcoal pulverized, oil, grease, pulverized charcoal, iron, sand used for the noyau, Excellent sand, sand, the finest that you can, lead, tin, wetted sand, smoke (×2), gold, fine tin, lead, fine & new, smoked (×3), smoke of a tallow candle, pitch rosin, looking-glass tin, candle

Measurements: as much as two walnuts, the same size as a bottle in which one boils tisane, half a glass, silver spoonfuls, lb, ounce, grains, size of a bean

Plants: walnuts, bean

Tools: frames (×6), pestled, noyau molds, mortar, pestle, sieve, marble, bottle of common water, bottle in which one boils tisane, good pot of water, silver spoonfuls, file, frame (×10), trivets of iron, hands, crucible (×4), tallow candle, press, candle, small brushes, large frame

Advice about the above fol. 119r · p119r_1

Advertisseme{n}t sur ce que dessus

CASTING

Body parts: hand

Definitions: Good tin

Materials: Good tin, silver, tin (×2), Looking-glass tin, smoked (×2), sand (×2), perfect sand for the frame, asfalt, flour, grain of wheat, lead, sand that you use for the noyau

Measurements: thickness of <-un-> the width of a grain of wheat

Places: Germany

Plants: wheat

Tools: frame (×2), hand, frames

Fashion of preparing spat fol. 119v · p119v_1

Facon dacoustrer le spat

CASTING

Body parts: fingers

Materials: spat (×2), cooked plaster, earth (×2), filth (×2), sal ammoniac water (×2), water (×4), pure aspalte (×2), wet flour, gold (×2), silver, copper, lead (×2), latten (×2), tin (×2), metal, metals, plaster

Personal names: Gesnerus

Places: Germany

Professions: potters

Tools: pestles, fornais of the potters, vase, sponge, frame (×3), fingers

Excellent secret for molding hollow and very delicately in fine gold fol. 119v · p119v_2

Excellent secret pour mouler creus et fort subtil en or fin

CASTING

Animals: lizard

Materials: fine gold (×2), sand, billon silver, gild, gold (×2), paper, aquafortis, billon

Measurements: thickness of a piece of paper

Stamped medals from wax fol. 120r · p120r_1

Medailles destampe par la cire

CASTING;WAX PROCESS

Animals: lizards

Materials: wax (×2), rosin, latten, copper, tin, lead, sheets of gemstone foils

Tools: sheet of tin

Sand for casting in gold fol. 120r · p120r_2

Sable pour gecter en or

CASTING

Essays: Circulation of Knowledge in Europe (Sofia Gans)

Definitions: couleur

Materials: Sand for casting in gold, gold (×7), common sand of goldsmiths, common sand, alum, plaster, brick, feather alum, crocum ferri, crocum (×2), silver, Sublimate, sulfur (×2), sublimate, smoke, couleur, verdet, sal ammoniac, saltpeter, borax, branch of wormseed

Measurements: third part, three <-or 4-> days [<-and->] <-three days-> and three nights, years

Places: Germany

Plants: wormseed

Professions: goldsmiths (×2), glassmaker's

Time and temporal: days (×2), nights, years

Tools: glassmaker's fornase, flat box

Nightingale - fol. 120r-120v · p120r_3

Rossignol -

CASTING;ANIMAL HUSBANDRY

Animals: Nightingale, larks, ants, nightingales, mutton, mealworms

Body parts: hand

Environments and physical spaces: barn, anthill

Materials: green fabric, mutton heart, delicate flesh, well-minced flesh with the yolk of a hard-boiled egg, meat & the egg, live mealworms

Measurements: times a day (×2), half a day

Time and temporal: everyday, first day, next day, day (×3), next morning

Tools: cage (×2), green fabric, drawer, barrel full of earth, hand, small pointed stick

Crocum ferri fol. 120v · p120v_1

CASTING;MEDICINE

Body parts: blood

Materials: Crocum ferri (×2), needle filings, feather alum

Medical: plastered

Tools: molds

Anatomy fol. 120v · p120v_2

Anatomie

PRESERVING

Materials: good quicklime

Making silver run fol. 120v · p120v_3

Fayre courre largent

CASTING

Essays: Making Gold Run for Casting (Emily Boyd, Jef Palframan, Pamela H. Smith)

Materials: silver (×2), arsenic (×3), tartar (×2), melted silver, æs ustum (×2), filings of <-latten-> of thin copper, <-u-> antimony, sublimate, finely pulverized, plaster, crocum, feather alum, common salt, saltpeter, copper filings, antimony, tallow

Keeping dry flowers in the same state all year fol. 120v–121r · p120v_6

Garder fleurs seiches en mesme estat toute lannee

PRESERVING

Essays: Keeping Dry Flowers in the Same State All Year (Caitlyn Sellar)

Body parts: fingers, fist, hand

Environments and physical spaces: hot sun, in the sun, rooms, cabinets, current of the waters, in sunlight, serain & the moisture of the night, dry place, rainy and humid weather, sun

Materials: sand (×7), sand with which goldsmiths buff enamels or the white one that glassmakers use, enamels, any lean sand that does not hold together, horsehair, grain, sand, the leanest & driest you can find, enamel, dust (×2), River sand, linen, distilled vinegar, wax, mastic, residue of common vinegar

Measurements: hourglass, several days (×2), when their season is past

Plants: cornflowers, marigolds, yellow meadow flowers, ranunculus, pa[<-l->]ta lupina, amaranth, broom, Pansies, Carnations, roses

Professions: goldsmiths (×2), glassmakers

Time and temporal: several days (×2), all year, out of season, when winter denies flowers, season

Tools: box (×5), fingers, hourglass, fist, horsehair sieve, linen cloth, well sealed vessel, paintbrush, big vessels

For keeping fruits all year fol. 121r · p121r_1

Pour garder les fruits tout lan

PRESERVING

Body parts: hand (×2), breathe

Environments and physical spaces: serain & <-s-> quite dry weather, well, cellar

Materials: glass (×3), straw, wax (×2), water, leaves from vine

Plants: vine

Sensory: touching, touch

Time and temporal: year

Tools: glass bottles, glass boxes, case, vat, or in a cos of earth full of water

For casting in silver fol. 121v · p121v_1

Pour gecter en argent

CASTING

Body parts: fingers, thumb, handful

Materials: silver (×3), sand (×4), plaster, reheated brick, reheated feather alum, pure feather alum, reheated & pulverized, sal ammoniac, common water, thick sauce, thin mustard, eau-de-vie, crocum, metals, Alloyed silver is better for casting than the fine one, feather alum, Sal ammoniac, gold (×2), water (×2), Latten

Measurements: parts (×4), part, earthenware bowl, from which the peasants eat their soup, as much as you can take with 4 fingers and the thumb, small double handful

Plants: mustard

Professions: peasants

Tools: earthenware bowl, from which the peasants eat their soup, mortar, spatula, paintbrush, table, mold, molds, bowl

Silver for casting fol. 121v · p121v_2

Argent a gecter

CASTING

Coins and currency: teston, sous

Materials: Silver, not fine silver but alloyed, solder, teston silver, alloyed silver, silver (×4), earth (×2), sandy earth, cloth waste which founders use to cast their cannons, good lute, iron wire (×2), silver from the Capital, luting, gold, ashes, lute

Measurements: denier

Places: Capital

Professions: founders, goldsmiths

Tools: good lute, molds (×4), iron wire (×2), luting, lute

Weapons: cannons

Arranging various animals fol. 122r · p122r_1

Plant des animaulx divers

CASTING

Animals: female lizards, snakes

Materials: wax (×3), iron wire (×2)

Tools: table, thick needle, tip of a hot iron wire, frame, mold, point of a penknife, iron wire

Flower in the mouth of the snake fol. 122r · p122r_2

Fleur en la bouche du serpent

CASTING

Animals: snake (×2)

Body parts: hand

Materials: wax (×2), <-iron-> wire, sand

Medical: antidote

Plants: wormwood

Tools: end of a <-iron-> wire that is hot, hand, thread, needle

Cleaning the bowl and the spoon with which one tempers the sand fol. 122v · p122v_1

Nettoyer lescuelle et la cueillere dequoy on destrempe le sable

Letters and molded paper fol. 131r · p131r_2

Le{tt}re et papier moule

CASTING

Essays: **Molding Paper with Raised Letters** (Raymond Carlson, Jordan Katz, Baris Gokturk)

Materials: paper (×2), ink, eau-de-vie (×2), clay

Tools: clay slab

For adorning beds, mirrors, and suchlike fol. 131r · p131r_3

Pour orner des lits mirouers et semblables

DECORATIVE

Environments and physical spaces: beds, mirrors

Materials: slate, mixed tin, gild, gold leaf, rubies, orpiment

Tools: quite flat slate

For teaching a dog well fol. 131r · p131r_4

Pour bien aprendre un chien

HOUSEHOLD AND DAILY LIFE

Essays: *La Maison Rustique*: Cultivation and the Genre of the Household Manual (Katie Bergen)

Animals: dog

Body parts: armpit

Materials: cheese

Professions: master, apprentice

Molded waxes fol. 131r–131v · p131r_5

Cires moulees

CASTING

Materials: gold (×2), silver (×2), wax (×7), melted sulfur, candle smoke, sulfur, ceruse (×3), boiling water, waxes (×2), lead white, metals, White wax, filth

Tools: candle, mold (×5)

When the cast of tin or lead becomes porous fol. 131v–132r · p131v_1

Quand le gect destaim ou de plomb soufle

CASTING

Animals: large lizard

Body parts: finger (×2)

Materials: tin (×10), lead (×9), wax, silver (×3), gold (×3), rosin, looking-glass tin, solder, Tin, metal, Lead, water (×2)

Measurements: 3 (×2), lb (×2)

Sensory: of such a heat that you can handle it without harm, or that you can keep your finger in the gate without burning yourself, cries loudly, cries weakly, so hot that you can bear putting your finger in it

Time and temporal: long time

Tools: mold (×4), finger (×2), burin, file, chaple

Mold made in two casts fol. 132r · p132r_1

Moule faict a deulx gects

CASTING

Materials: lutes, earth, smokes, sand, tin, silver, gold, plaster, lute

Tools: Mold, clamps, lutes, mold (×4), presses, terrine, clamp, lute

Method for reheating the molds fol. 132r–132v · p132r_2

Forme de recuire les moules

CASTING

Body parts: fingers

Environments and physical spaces: wind from a window

Materials: charcoals (×7), charcoal, smoke, luted

Measurements: fingers

Tools: molds (×3), forge, mold (×4), grate, oven, little bellows, luted

Common sand from the mine fol. 132v · p132v_1

Sable commun de mine

CASTING

Environments and physical spaces: mine

Materials: Common sand from the mine

Tools: frame

Crocum ferri fol. 132v · p132v_2

CASTING

Animals: very small female lizard

Body parts: fingernail (×2), fingers

Materials: Crocum ferri, vinegar, porphyry, very good vinegar, crocum (×2), sand (×2), feather alum, crocum ferri, gold, silver (×2), filings of needles, distilled vinegar, steel fillings & needles

Measurements: days, several times each day, half

Sensory: perceived on the fingernail, when scraping it with the fingernail, it is a sign that the crocum is good, very fine, & well prepared, you will find it so, by scraping a little harder than the other where there is none

Time and temporal: days, day

Tools: porphyry, fingernail (×2), pot, four à vent, fingers, mold (×4), molds (×4)

Gilding animals cast in silver fol. 132v · p132v_3

Dorer animaux gectes d'argent

CASTING

Materials: Gilding, silver (×2), gild, amalgam

Hard wax for imprinting seals fol. 133r · p133r_1

Cire dure pour empraindre cachets

WAX PROCESS

Essays: Wax for Seals in Ms. Fr. 640 (Nancy Olson)

Materials: Hard wax, white wax, very finely ground ceruse or lead white, turpentine, wax

Measurements: drop

Professions: goldsmiths

Feet of small female lizards for gold and silver fol. 133r · p133r_2

Pieds de petites lezardes pour or et argent

CASTING

Animals: small<-s-> female lizards, large lizards

Materials: gold, silver, wax (×3)

Tools: mold

Marks from the points of iron wire which are found on the head of the animal fol. 133r · p133r_3

Marques des poinctes de fil de fer qui se trouvent en la teste de l'animal

CASTING

Materials: iron wire, sand, iron (×2), hard wax, mastic, cement

Tools: points of iron wire, points, point, iron point, hot iron wire

Clamps and broken mold fol. 133r · p133r_4

Crampons et moule rompu

CASTING

Materials: quicksilver, Lute, silver, gold, lute (×2), sand

Tools: Clamps, mold (×4), clamps (×3), molds, Lute, lute (×2)

Bubbles and little holes which are found in the mold fol. 133v · p133v_1

Le souffleme{n}t et petits trous qui se trouvent aux moules

CASTING

Materials: sand (×2)

Tools: mold, small molds, bowl (×2)

Thing that does not release fol. 133v · p133v_2

Chose qui nest en despouille

CASTING

Animals: small female lizards

Materials: blood, filth, mold, wax

Tools: mold (×4), chisels, oven, pin (×2), little points

Various animals entwined fol. 133v–134r · p133v_3

Divers animaux enlasses

CASTING

Animals: snake (×4), lizard (×3), frog, wall lizard (×3), small wall lizard

Materials: earth, wax (×6), iron wire, earthen, tempered sand, clay, metal, wetted sand

Tools: mold (×4), oven, hot iron wire, earthen slab, points, clay slab, slabs of wax

For mending a pierced mold fol. 134r · p134r_1

Pour racoustrer un moule perce

CASTING

Materials: iron, melted wax, tempered sand, lute

Tools: mold (×2), iron points, lute

Sand of crocum fol. 134r · p134r_2

Sable de crocum

CASTING

Materials: Sand of crocum, crocum (×2), crocum ferri, silver (×2), gold (×2), lead, tin

Tools: molds

For making ✱ run fol. 134v · p134v_1

Faire courre le ✱

METAL PROCESS;CASTING

Essays: **Making Gold Run for Casting** (Emily Boyd, Jef Palframan, Pamela H. Smith)

Animals: spider

Materials: ✱, Verdigris, sal ammoniac, borax (×2), saltpeter (×2), verdigris, marble, good strong vinegar, couleur, verdet, oil, metals

Measurements: as much of one as the other (×2), half of the others

Tools: marble, forge

For casting of gold in large works fol. 134v · p134v_2

Pour gect dor en grand ouvraige

CASTING

Materials: gold (×2), iron wire, lead, tin

Tools: clamp, molds, iron wire, little bands, forge

Secret for soldering gold and silver in small works fol. 134v · p134v_3

Secret pour soulder lor et argent en petit ouvrage

CASTING

Body parts: phlegm, white thick <-which-> saliva that is found on the teeth, teeth, saliva

Materials: soldering, gold (×2), silver (×2), wax, soldering gold, phlegm, white thick <-which-> saliva that is found on the teeth, solder (×2), little spangle of gold, fat earth, saliva, borax, Boiled water of quince seed

Plants: quince

Tools: burin

Couleur for gold or mixture fol. 135r · p135r_1

Couleur pour or ou saulce

CASTING;METAL PROCESS

Essays: **A Fragmentary Goldsmithing Manuscript from Seventeenth-Century Toulouse** (Sarah Muñoz)

Materials: Couleur, gold (×2), Verdigris, sal ammoniac, saltpeter, Saltpeter, couleur, brittle melted gold

Measurements: as much of one as the other, as much as a bean

Plants: bean

Gate fol. 135r · p135r_2

Gect

CASTING

Animals: lizards

Body parts: fingers

Environments and physical spaces: moist & humid place

Materials: metal (×2), wax

Measurements: fingers

Tools: big molds, mold (×2)

Vine leaf and small frog fol. 135r · p135r_3

Foeille de vigne et petite grenoille

CASTING

Animals: small frog, spider, frog

Materials: clay (×3), wax, stil de grain yellow, verd de terre

Plants: Vine, vine (×3)

Time and temporal: in autumn

Tools: clay slab, small points, small bristle brushes

Casting in ☼ fol. 135v–136r · p135v_1

Pour gecter en ☼

CASTING

Body parts: fingers

Definitions: couleur

Environments and physical spaces: wind

Materials: couleur (×2), sand (×4), water, gold (×12), tin, aquafortis (×2), latten (×3), sol, plate of lead, ☼ (×2), borax (×4), charcoals, charcoal (×2), smokes, verdet, saltpeter, sal ammoniac, lute, crocum

Measurements: fingers, size of a bean, lb

Plants: bean

Professions: boy

Tools: small & large bellows, mold (×3), moulets, crucible (×7), little bellows, fourneau à vent, fournaise, forge (×3), bellows, small bellows (×3), lute, four à vent

Enamelling thin works fol. 136r · p136r_1

Esmailer ouvraiges tanvres

CASTING;METAL PROCESS

Essays: What is *Esmail* in Ms. Fr. 640? (Amy Chang)

Materials: Enamelling, gold leaf, enamel

Professions: Goldsmiths

Tools: brim of a burin

For casting in latten fol. 136v · p136v_1

Pour gecter en letton

CASTING

Animals: pig

Environments and physical spaces: the air, the wind, wind

Materials: latten (×7), latten from skillets in which one makes the mush for little children, German tokens (×2), calamine (×7), remelted latten, fresh calamine (×2), gold (×2), silver (×2), copper (×2), metal (×2), nails of rosette, soft latten, strong yellow latten, water, melted silver, steel, Sal ammoniac, Huile tingente, sand, yellowed latten, prepared tutty (×2), calamine smoke, glass, very yellow latten, red copper, charcoal, iron, cloth, pig fat, saltpeter, sal ammoniac

Medical: keep away from the fumes, for they are pernicious

Places: German (×2)

Professions: little children, Casters

Tools: mold (×2), frame, stalk of copper or iron, cloth soaked in pig fat mixed with saltpeter or sal ammoniac

For casting in red copper fol. 137r · p137r_1

Pour gecter en cuivre rouge

CASTING

Environments and physical spaces: wind

Materials: red copper (×2), Pure red copper from a cauldron or other thin works, sal ammoniac, fine tin, copper, gold, silver, latten (×3), metal (×2), steel, melted silver (×2), Red copper, strong smoke, paper, sand, Copper, water

Tools: cauldron, mold (×2), tongs, brazier, pot, vessel

Huile tingente to make metals run fol. 137r · p137r_2

Huile tingente pour fayre courre les metaux

CASTING;METAL PROCESS

Environments and physical spaces: cold & humidity, spring of water in the pit

Materials: Huile tingente, metals, ☿ sublimate of Venice, arsenic sublimate, aes ustum, sal ammoniac (×2), glass, hot ash, wax, melted metal, tartar, filth, nastiness, tin, water

Measurements: pea (×3)

Places: Venice

Professions: Founders of large casts for statues, founder

Tools: glass bottle

Clamps fol. 137r · p137r_3

Crampons

CASTING

Materials: iron wire

Tools: Clamps, flat pincers of iron wire, anvil, molds

Tempering sand for molds of flat medals fol. 137v–138r · p137v_1

Destremper sable pour moule de medailles plattes

CASTING

Essays: The Body and the Senses in Ms. Fr. 640: Towards a "Material Sensorium" (Tillmann Taape)

Animals: lizards, crayfish (×2), crabs, stag beetles

Body parts: finger

Materials: sand for molds of flat medals, wax (×2), metal, oiled (×5), eau-de-vie (×2), water (×6), sand (×10), cold water, Hot water, oil (×4), hot water, gold (×2), silver (×2), copper, latten, thick bones, ☿ (×2), scrapings of the mold, brick (×2), pieces of the molds that have been used, lutes, sal ammoniac water, spat from Germany, excellent sand, metals, sulfured black wax, wood, fresh clay, grey earth, The yellow

Measurements: of such heat that you cannot hold your finger there without feeling strong heat

Places: Germany

Sensory: of such heat that you cannot hold your finger there without feeling strong heat

Tools: molds (×6), paintbrush, mold (×13), finger, point of a knife, knife points, point of an oiled paintbrush, clamps, lutes, frames, fresh clay slab, table

Talcum mixed in the molds fol. 138v · p138v_1

Talc mesle aulx moules

CASTING

Materials: Talcum, oil, steel, sand

Tools: molds, steel mortar, pestle, file

Gold cast very thinly fol. 138v · p138v_2

Or gecte fort tanvre

CASTING

Animals: lizards

Materials: Gold, solder, gold, cloth (×2), Fine gold, wheat oil, alloyed gold, soldered

Plants: pansy, wheat

Professions: goldsmiths

Tools: forge, cloth (×2), things that withstand the fire, hammer

Counterfeit diamonds put in a work fol. 138v · p138v_3

Diamants contrefaits mis en oeuvre

STONES

Essays: A Fragmentary Goldsmithing Manuscript from Seventeenth-Century Toulouse (Sarah Muñoz)

Environments and physical spaces: daylight

Materials: Counterfeit diamonds put in a work, black modeling wax, waxed, wheat oil, lamp smoke, false stones, stone (×3), wax, steel

Plants: wheat

Tools: steel point, small finishing hammer

Casting of lead and tin fol. 139r–139v · p139r_1

Gect de plomb et destaim

CASTING

Animals: lizards, snakes, cuttlefish (×2)

Body parts: finger

Environments and physical spaces: in a very flat & level place

Materials: lead (×7), tin (×2), fine tin (×3), new & unadulterated lead, sand (×2), metals, charcoal, rosin, filth (×2), looking-glass tin, melted metal, metal (×2), new lead, sheets of copper (×2), ash, cuttlefish bone (×2), paper (×3), written paper, cartons, gold, hard wood, carton (×2), earth, plates of copper, iron (×2), wood, fer blanc

Measurements: ⅔ (×2), lb (×3), as much as a bean, Test for this effect with paper. If it turns the paper red, it is enough, it is good to cast, but if it blackens the paper, it is too hot., half (×2)

Plants: bean

Sensory: until you can hold your finger without harm in the hole of the gate

Tools: mold (×5), finger, crucible (×2), bellows, scraper, little bellows, press, molds (×2), very tight presses, sheets of copper (×2), large molds, square pots, cuttlefish bone (×2), paper (×3), cartons, point of gold or hard wood, carton, adapted carton, stirrup or screw of iron

Cast of wax to represent an animal that one has not got fol. 139v–140v · p139v_1

Gect en cire pour representer lanimal quon na point

CASTING; WAX PROCESS

Essays: **Black Sulfured Wax** (Charles Kang)

Animals: snake, snakes

Body parts: finger

Materials: white plaster, sands, cold water, water so hot, water (×2), hot water (×2), wax (×16), sugar, copper (×3), sulfur (×4), slate, varnish, silver (×3), white wax, filth (×2), charcoal, pestled & finely passed through a linen or a sleeve, linen, charcoal, melted wax, the aforesaid pulverized charcoal, smokes, pulverized charcoal, black sulfured wax, pestled charcoal, ash, modeling wax, aquafortis, tempered sand, gold

Measurements: a good hour, at least as long in water so hot, that, at the beginning, you cannot hold your finger in it, night, day, half, bowl with handles, as a large walnut, when it no longer smokes, when it makes large tracts <-se-> <-re-> pulling at the edges, & motionless & close <-to-> one to the other

Plants: walnut

Sensory: water so hot, that, at the beginning, you cannot hold your finger in it, This wax is very soft & amiable & pliant as copper, and it is so strong because of the sulfur, which renders it meltable much before the other, such that you can prove it on a hot slate, your wax has passed its high heat, which you will recognize when it no longer smokes

Time and temporal: well in advance, a good hour, at least as long, night, day

Tools: mold (×8), mold which is of white plaster, finger, molds, hot slate, candle (×2), hot penknife, stick, taper, pestled (×2), linen, sleeve, bowl with handles, little stick (×2), mold à noyau

For casting in sulfur fol. 140v · p140v_1

Pour gecter en soufre

CASTING

Molding hollow fol. 150v–151v · p150v_1

Mouler creux

CASTING

Essays: Turning Turtle: The Process of Translating BnF Ms. Fr. 640 (Soersha Dyon, Heather Wacha)

Animals: turtle (×3), turtles (×4), snake, lizard

Body parts: fingers, end of your finger

Definitions: chaple

Materials: earth (×2), cement, lead (×8), fine tin, crocum (×2), sand (×3), paper, white wax, black sulfured wax, charcoal (×2), ash, wax (×11), lute (×5), common lute, pestled brick, plaster, tin (×5), black wax (×3), iron, iron wires, ashes of the wax, iron wire, soft clay, molding sand, clay (×2), water, sand which served for the molds, tallow (×2), solder, hot water (×2)

Measurements: half (×8), thickness of the back of a knife, fingers

Personal names: Maistre Alexandre

Professions: Maistre

Time and temporal: long time (×2)

Tools: small chisel (×3), mold (×27), burin, chaple, very sharp penknife, small file, file (×2), molds (×3), press, little small chisels, round cutting-punch, gouge, small chisels, small cutting-punches, small gouges, small serrated chisels, clamps, lute (×5), common lute, pestled, back of a knife, hot iron <-touching-> point, iron wires, bellows, iron wire point, table, circle of soft clay, clay circle (×2), end of your finger, small point, point, points

Wheat oil fol. 151v · p151v_1

Huile de froment

CASTING

Animals: fly

Materials: Wheat oil, iron plates, wheat, black oil, oil, silvered, gilded, varnish, iron, gilded leather, false white stones

Plants: Wheat, wheat

Professions: makers of gilded leather

Tools: sparkling hot iron plates

Weapons: sword guards

Molding a rat fol. 152r · p152r_1

Mouler un rat

CASTING

Animals: rat (×6), lizard, small mouse, snakes, lizards, fly, big rat, mouse, bird

Environments and physical spaces: in the cold

Materials: silvered, wheat oil (×4), sand (×2), common oil, halves of well-rounded peas, olive oil, egg yolk, oiling, clay, iron, eau-de-vie, oil, biggish bones, bones, Butter

Measurements: days

Personal names: tyrant of Syracuse

Places: Syracuse

Plants: wheat (×4), peas, olive

Time and temporal: days

Tools: little candle, very thin comb, clay slab, iron point, points, mold (×4), oven

Repairing cast things fol. 152v · p152v_1

Reparer les choses gectees

CASTING

Body parts: foot

Materials: metal, plaster, crocum, tin (×4), leather, fine sand, sand, wax, delicate plate of lead, lead (×3), latten wire, rosin, solder (×2), iron, gold

Professions: goldsmith's

Tools: mold (×2), leather cushionet, goldsmith's table, files, rope (×2), foot, bag, burin (×2), file, chaple, delicate plate of lead, latten wire, hot iron, forge, small chisels, cushionet

Molding hollow for seals or other things fol. 153r · p153r_1

Mouler en cave pour cachets ou aultre

CASTING

Body parts: urine

Materials: wax (×8), glass, slate, sand (×3), oil, eau-de-vie, hot water, alloyed lead, lead (×3), tempered sand, silver (×2), metal (×3), melted wax, warm water, warm urine, gold, tin, crushed chalk, candle smoke, dried glair of egg, Lamp smoke, soot black, White wax

Tools: glass or smooth slate, paintbrush, candle

Giving the thickness that you wish to a medal fol. 153r–153v · p153r_2

Donner telle espaisseur a une medaille que tu voudras

CASTING

Materials: crocum, well-ground iron scales, flour, boxwood, paste (×6), cotton, melted butter, olive oil, clay, sheets of lead & copper, carton, oil (×2), butter (×2), sand, hot water

Plants: boxwood, olive

Tools: mold (×6), small stick of boxwood, rolling pin (×2), cotton, paintbrush, clay contour, rolling pins, sheets of lead & copper, carton

Testing the goodness and strength of a sand to be reheated fol. 153v · p153v_1

Essayer la bonte et force dun sable a recuire

CASTING

Materials: sand

Time and temporal: long

Tools: mold

Softening gold fol. 153v · p153v_2

Adoulcir lor

METAL PROCESS

Materials: gold (×2), cement, antimony, verdet

Gold not being fixed fol. 154r · p154r_1

Plants: wheat (×2), rose, pansy

Tools: small paintbrush

Strawberries fol. 154v · p154v_5

fraises

CASTING

Materials: solder, tin, latten wire, solders

Plants: Strawberries, strawberry

Molding a rose fol. 155r · p155r_1

Mouler une rose

CASTING

Essays: **Molding a Rose** (Giulia Chiostrini, Jef Palframan)

Body parts: breath

Materials: solder, sand (×2), melted butter (×2), tempered sand (×2), ashes, wax (×4), ash, eau-de-vie, clay, oil, water (×2), earth, lead, tin, tinned latten

Plants: rose (×9), rose bush (×2), rose bushes, strawberry plants

Time and temporal: long time

Tools: mold (×4), threads, molds, circle of clay

Rose fol. 155v · p155v_1

CASTING

Essays: **Molded Roses in Sixteenth-Century France** (Raymond Carlson, Jordan Katz)

Animals: fish (×2), fly

Definitions: modeling wax

Materials: tin (×3), solders (×2), latten wire, solder (×3), glues, fish glue (×2), glue, modeling wax, white wax, well-ground ceruse, lead white, iron, gold, silver, metals

Plants: Rose, rose (×5)

Tools: stalk of latten wire, small hot point of iron, small points, nails, molds

Molding promptly and reducing a hollow form to a relief fol. 156r · p156r_1

Mouler promptement et reduire un cave en relief

CASTING

Essays: **Creating Original Patterns for Casting in Ms. Fr. 640** (Rozemarijn Landsman, Jonah Rowen)

Materials: colored wax, sand, lead, tin, wax (×2), gold, silver, metal, bread pith, melted wax

Tools: mold

Very light and hollow work of gold fol. 156r · p156r_2

Ouvrage dor fort leger et creux

CASTING

Animals: lizard (×2)

Coins and currency: billon

Materials: gold (×2), base silver (×2), gild, gilding (×2), good aquafortis, silver, amalgamated gold, aquafortis

Tools: scratch-brush

Chasing fol. 156r · p156r_3

Ciseller

CASTING

Body parts: very light hand

Materials: Lead, great metals

Tools: Chasing, burin, onglet, ordinary engraving burin, chape, small chisels

Molding a fly fol. 156v · p156v_1

Mouler une mousche

CASTING

Animals: fly (×6), largest <-vo-> flies, pork, fish

Definitions: modeling wax

Environments and physical spaces: pantries

Materials: olive oil (×2), silver (×4), gold (×4), wax, melted, iron wire (×2), melted butter, wheat oil (×2), eau-de-vie, tallow, pork fat, butter, tin (×2), solder, metal, enamelled, enamels, window glass from Lorraine, melted wax (×2), iron (×2), wax, glue (×4), fish glue, modeling wax, white wax, ceruse, lead white, spinet strings

Music: spinet

Places: Lorraine

Plants: olive (×2), sage (×5), wheat (×2)

Tools: hot iron wire point (×2), little paintbrush, iron point, scissors, small pincers, hot iron point

A means of goldsmiths for molding hollow fol. 157r · p157r_1

Moyen des orfevres pour mouler creux

CASTING

Animals: cuttlefish (×2)

Materials: cuttlefish bones (×2), wax, lead, bones (×2), paper, gold, silver, solder

Professions: goldsmiths

Tools: cuttlefish bones (×2), bones (×2), paper, chaple

Rouge clair fol. 157r · p157r_2

Rouge cler

PAINTING;METAL PROCESS

Materials: Rouge clair, gold, thinly beaten <-esp-> & well burnished with a chaple, gold ingot

Professions: goldsmiths

Tools: chaple

Cleaning and degreasing your works cast from tin and others fol. 157r · p157r_3

Nettoyer et desgraisser tes ouvrages gectes destain et aultres
